Our service range

AGITATORS FOR INDUSTRY

We offer customized agitator solutions, specially tailored to your requirements in the industrial sector.

Our long-axis and submersible agitators are used in a wide range of industrial sectors: Whether wastewater management, tunnel construction, chemicals, petrochemicals or food industry - we meet every mixing challenge.

Our propellers

Efficient stirring is a decisive factor for the success of our processes. The agitator blade takes a central role in this. The blade influences the efficiency and the result of agitation like no other component of the agitator. However, depending on the tank, the agitator location and the substrate properties, the requirements on the agitator blade vary significantly.

As an experienced partner for industrial agitators, we offer you a wide range of agitator blade variants to optimize your processes. We develop and manufacture suction and push propeller, as well as aerodynamically optimized high-performance blades (HD+). Diameters from 250 to 2.600 and speeds from 1.450 rpm to 35 rpm allow specific configurations for maximum energy efficiency.

The material of the propeller must be suitable for the pH value of the substrate. Depending on the aggressiveness of the medium, either steel, galvanised, painted, hardened, or stainless steel is suitable.

With the possibility of uncomplicated retrofitting with a new agitator blade, even on older models, you always have all options open to meet your requirements and maintain the optimum performance of your agitator.

S-Mix

Type	Power	Ø Propeller	Speed	Axial force	Pumping rate
S-MIX	4.0 kW	310 mm	950 rpm	0.70 kN	13 m ³ /min

- Especially for small and medium tank sizes in industry
- For TS contents of up to 8 % and pH values of 5.5 - 8.2
- Shaft length 0.6 | 0.8 m in V2A or V4A
- For operating depths up to 15 m below level
- Standard shutoff device allows seal and bearing replacement with filled vessel

GIANTMIX FR light

Type	Power	Ø Propeller	Speed	Axial force	Pumping rate
FR 40-180	4.0 kW	700 mm	180 rpm	0.85 kN	44 m ³ /min
FR 40-250	4.0 kW	620 mm	250 rpm	0.95 kN	38 m ³ /min
FR 75-280	7.5 kW	700 mm	280 rpm	2.0 kN	57 m ³ /min
FR 75-380	7.5 kW	520 mm	380 rpm	1.35 kN	35 m ³ /min

- Especially for concrete or steel tanks with nearly constant substrate levels
- For dry matter content up to 12 % and pH-value 6.5-8.2
- Tube length 1.0 | 1.5 in ss304 or ss316
- Installation depth up to 6 m beneath substrate level
- Easy assembly and maintenance outside the tank

FR6	22.0 kW	750 mm	400 rpm	4.5 kN	116 m ³ /min

- Mainly for fermenter and end storages with nearly constant substrate levels
- For dry matter content up to 14 % and pH-values from 6.5 - 8.2
- Tube length 3.0 | 4.0 m in ss304 or ss316
- Installation depth up to 8 m beneath substrate level
- Horizontally adjustable ± 25°, Vertically adjustable ±11° optional ±30°
- Easy assembly and maintenance outside the tank

Submersible agitator OPTIMIX

Thanks to our modular design, our submersible mixers can be individually combined in regard to motor power, gear, propeller and mast size. This enables us to offer an agitator that is optimally matched to your needs.

All our submersible mixers are suitable for substrate temperatures of up to 55°C and have separated oil chambers for motor, gear and bearing housing. Our special SUMA mechanical seal SiC/SiC seals the rotating shaft to the bearing flange and prevents substrate from entering the agitator blade bearing.

Microbe-resistant cable includes as standard in the delivery.

Central mixer

Central mixer

For solutions perfectly tailored to your requirements, we draw on our extensive product portfolio of agitators. This includes the central mixer Z-MIX, which ensures axial mixing of your ferment for fermentation of sewage sludge, waste, and agricultural and industrial residues. In particular, the Z-MIX is suitable for use in tanks with a volume of 100 - 10,000 m³, where diameter and height correspond to a similar length. The agitator is characterized by low energy consumption.

ENGINEERING

Based on tank geometry, substrate properties and many other factors, our engineers use software-supported flow simulations and load capacity calculations to design a central mixer that will perfectly meet with your requirements.

PRODUCTION

Since the company foundation in 1957 the value creation has almost exclusively taken place at our headquarters. Our ideal manufacturing depth impacts the quality during the entire process chain, enabling us to carry out adjustments with ease any time and to execute customization cost-effectively.

SERVICE & ASSEMBLY

By purchasing a SUMA mixer, you have chosen maximum quality. Be it for a new installation, modification, component exchange or maintenance work - our team of experienced service specialist will support you 24 hours a day, 365 days a year. Depending on the customer's requirements, the Z-MIX can be installed from outside or in sections from inside. In addition access to the drive shaft offers easy maintenance.
